The instruction shows how to charge and maintain the battery, some safety notices and the specification. Please use the battery properly according to this instruction to prolong the battery life and its performance.

4.1 Battery Parameters

Name	Parameter	Name	Parameter
Type	Li-ion battery	Working Temperature	0°C-35°C
Charging Time	4-6 hours	Charging Temperature	0°C-35°C
Voltage	25.2V	Store Time (-10°C-40°C)	3months (full charge)
Initial Volume	6Ah/7.8Ah	Store Humidity	5%~95%
Max Charging Voltage	29.4V	Max Charging Current	1.5A

4.2 Battery Safety

Please DO NOT use the battery under circumstances

- There's peculiar smell or overheat or leaking of any substance. Do not touch any substance leaking from the battery.
- Only trained professor can disassemble or maintain the battery.
- Do not let child or animal touch the battery. Disconnect the charger when you install the battery or try to ride. It's dangerous to use the scooter when the charger is connected.
- The battery should be used within the temperature range specified in the battery parameters in order to keep the scooter run with best efficiency.

- Li-ion battery is considered dangerous and allowed to be shipped with permission from the local authorities.
- The battery contains dangerous substances. DO NOT open the battery or put anything into the battery.
- ⚠ You should only use the provided charger to charge the e-scooter.
- Charging the li-ion battery that is over discharge is prohibited. The battery that is over discharge should be disposed.
- The li-ion battery can be used with the permission of local laws.

4.3 How to charge

- Open the cap on top of the battery case.
 - Make sure the charging port is clean and dry.
 - Connect the charger with the battery and the other end with power(100V-240V;50/60Hz), make sure the charging indicator is on.
 - When the indicator light on the charger changes, indicating that the charging process is normal, otherwise check if the line connection is good.
 - When the indicator on the charger has color change, it indicates that the battery has been filled to 99%, Please stop charging; long time over charge will affect the battery life.
- Cover the charging port with the anti-dust cap in case some metal may touch the charging port and bring short-circuit after charging finished.**

Open the battery silicone cover

Insert the charging plug

Close the battery silicone cover after charging

5 Specification

Item X6	
	Scooter Specification
	Unfolded Size : 920*475*1070mm
	Folded Size : 675*130*305mm
	Height from pedal to ground : 136mm
Gross Weight :12kg	Net Weight : 10kg
Box Size :740*180*320mm	
Basic Information	
Max speed : 25km/h	Capacity : 25.2V/ 6Ah/7.8Ah
Mileage per charge : 10-25km	Motor Power : 24V/250W
Climbing angle : 15°	Max loading : 100kg
Charger Specification	
Model: Fy0632942000	
Input Voltage : 100-240Vac	Frequency : 50/60HZ
Output Voltage : 29.4V	Output Current : 1.5A
Working Temperature : 0°C-35°C	Store Temperature : -10°C-35°C

6 Maintenance

Maintenance considerations :

- Make sure the electric scooter charger and charging line are disconnected and ensure that the electric scooter is off.
- Wipe the shell with a soft cloth to clean the electric scooter. Please don't put more lubricating oil on bearing when you do the maintenance for it.

⚠ Warning

- It is forbidden to clean electric scooters by using water cannon or soaking in liquid. This will cause permanent damage of the electronic devices in the host.

Storage

- Please charge your electric scooter before storage, for preventing the battery from discharging too long time. Please ensure charge at least once every one months.
